I am in the Air force, so i move around alot. And i enjoy all the great programming i get with XM just leave them alone, so i can continue enjoying my weather and traffic no matter where i am. The quality I get with sattilite radio is so much better, i donot even listen to regular radio, because they do the weather and traffic for 1 minute and then you have to wait a half an hour before they do it again not to mention the annoying commercials. JUST LEAVE XM ALONE.
